Email Authentication Verification

SPF Status	DKIM Status	DMARC Status
FAIL	FAIL	FAIL

Why Was This Email Flagged? (Evidence Analysis)

Indicator / Rule	Forensic Explanation
● Test Reason	Verification test reason.

Analyst Guidance & Mitigation Recommendations

- 1. Do NOT click links or download attachments from this email.
- 2. Block sender domain and originating IP across organizational gateways.
- 3. Reset credentials immediately if user previously interacted with embedded links.
- 4. Geolocation data is approximate based on IP intelligence and should be correlated with internal SIEM logs.
